ORDERING TIPS

- Please order with the **Height (H)** dimension first and the **Width (W)** dimension second
- Filters should always be installed with the baffles running in the Vertical (top to bottom) position

- **LENGTHENS OIL LIFE** - Clarifies, brightens & freshens shortening more effectively than competitive products.
- **IMPROVES FOOD QUALITY** - Less oil absorbed into food.
- **SPECIAL INGREDIENT** - FRI-MOR™ filter powder (in the pad) chemically alters the oil to remove impurities.
- **CONVENIENT** - Compact 30-day packaging. Easy to store and easy to monitor frequency of shortening filtration.
- **SAVES MONEY** - Less add-back in fryers reduces excessive top-off with the more expensive oil.

2022: Celebrating our 25th Anniversary

Founded in 1997, we are proud to celebrate 25 years of supplying high quality parts and accessories to the restaurant industry, featuring exceptional service at competitive prices.

As DMI has grown and diversified its product offerings over the years, we have continued our mission to provide the best customer service in the industry. We remain a family-owned business, and we pride ourselves on working with our customers to make their buying experience as easy and efficient as possible.

Once you start working with DMI, you will quickly see what makes us an industry leader and a trusted vendor partner to thousands of restaurants worldwide.
